WEBINAR: VISA Mechanisms for Scientists

Location

Webinar
2:00 PM to 4:00 PM

www.nyas.org/VISAWebinar

Join this Webinar to learn more about the Green Card application process and the visa options for international researchers and scientists without employer sponsorships.

Obtaining a Green Card (Permanent Resident Card) is a goal for many foreign-born scientists who wish to begin or continue their research in the United States. In this interactive online presentation, an experienced immigration attorney with a scientific background will present on the Green Card application process and options for international researchers and scientists without employer sponsorships. The information will outline clearly the qualifications required for the Green Card application and how applications can improve their chances. The attorney will also discuss extending an H-1B visa beyond six years, travel and restrictions during the Green Card application process, costs associated with the application, and other questions and concerns.
