

Contract GIS Analyst

Project: Market Segmentation and Analysis

Rate: Hourly or Day Rate

Location: Boston, MA

Timetable: Position is Funded and Awaiting Hire

The contract GIS Analyst will use ESRI products to produce visualizations and reports that inform the client's go-to-market strategy and understanding of target markets. The project focus is on segmentation of US city and county markets in the areas of water resources and infrastructure.

Responsibilities of the position include, but are not limited to:

- Source and capture relevant geographic, demographic, environmental, and economic data
- Develop visualizations and geospatial analysis of datasets across US geographies
- Apply appropriate data filters to achieve desired outcomes
- Iterate and present outcomes to internal stakeholders

Requirements

- BA/BS or equivalent experience in natural science or engineering
- Experience and proficiency in use and application of ESRI products
- Excellent English language oral and written communication and presentation skills
- Exceptional organizational skills with strong attention to detail and quality

Preferences

- Experience supplying GIS spatial analyses and project deliverables to corporate clients
- Work location at company's Boston office

Note

- This is neither a cartography nor a big data analytics project.
