Geoscience Workshop

for Undergraduate and Graduate Students

May 6-10, 2024 Idaho State University

**Learn from
NASA & USGS
Scientists!**

The SPLIT Geoscience workshop provides intensive hands-on learning events to solve real-world geoscience problems using the most recent geospatial techniques learned from experts.

Workshop highlights:

- Remote Sensing for the Geosciences
- NASA Aerokat and Aeropod Flights
- Mars Mineralogy
- Drones for Science
- Field Trip to Craters of the Moon National Monument
- Processing and Analyzing Drone Imagery
- Paleontology and Fossils
- Career Pathways for the Geosciences

**Guest speakers
from ISU, UL,
BGSU, and UW**
